

# Universal Healthcare

working together on how health services can be fair  
and accessible to everyone.

We are looking at how we can evolve and design a health system that:

1. does not medicalise poverty (with a 'sticking plaster' approach) but provides genuine long term holistic care and support.
2. provides services that are accessible to all.
3. is open and frank about the reality of investment decisions (from a budget that has many competing demands), and the choices available.

This first workshop is all about working with our experiences and stories to build a shared picture of what is happening. You will meet people from across the local NHS, VCS, community and council sectors.

09.00 Registration.

09.30 Welcome and Introduction.

09.40 Getting to know each other: What brought you here today?

09.50 What is Working in ensuring everyone has a healthy life in telling our stories.

11.15 Aspirations Together – We introduce the key propositions in terms of how the NHS could rethink how it provides services. Together we work on: What are we hopeful for in terms everyone having a healthy life here? and what do we need to do to work together?

12.00 LUNCH.

12.30 What is going on now? Over the last 2 months we have been diving into the data to show who is getting what healthcare, and where. We share what we have found and work together on why what is happening is happening.

14.15 TEA.

14.30 Learning Journey Visits – you have the opportunity to go visit a service, a community to find out 'how things work' with a group of people from this workshop. Here we see who would like to host a visit, and who would like to go on a visit. We then prepare for the visits together.

15.30 Final questions, what's next & thank you's.

REFRESHMENTS AVAILABLE.
