Making Gender Equality Matters
in Schools (MGEMS) in Vietnam:
Measuring Teacher
Engagement and gender
equality

Dr Hai Pham

Hanoi University of Science and Technology

Gender and education in schools in Vietnam involves examining various aspects such as:

- enrollment rates,
- educational attainment,
- gender disparities,
- and initiatives promoting gender equality in the education sector.

By analyzing these factors comprehensively, policymakers, educators, and stakeholders can gain insights into the status of gender and education in schools in Vietnam and develop targeted interventions to promote gender equality and ensure equitable access to quality education for all children, regardless of gender.
